

Empty the Bowl

Directions: Take turns with a partner rolling the dice to see who can empty the bowl first. Player one rolls the die, removes that number of counters from the bowl and records his/her roll and how many are left in the bowl. Player two does the same. The first one to empty the bowl wins. You can decide if the last roll must be the exact number or not. Start with 20 counters, increase or decrease depending on skill level of your students.
