

Identifying Coins

Pennies & Nickels

Name _____

Date _____

Penny

Front

Back

= 1¢

A penny equals 1¢

and is counted by ones (1,2,3,4...), it is brownish in color and has a smooth edge.

In the example of 13¢, the 3 would be the number of pennies needed to make 13.

Nickel

Front

Back

= 5¢

A nickel equals 5¢

and is counted by fives (5,10,15...), it is silver in color and has a smooth edge. It is larger in size than a penny.

It takes 5 pennies to make 1 nickel.

If the bear costs 5¢, you could use 5 pennies or 1 nickel.
