

Name: _____ Date: _____

What Gives Me My Shape?

Your skeleton is made up of all the bones in your body. If you did not have a skeleton your body would be floopy like a jellyfish. Your skeleton gives you your shape. It also protects the important soft parts inside of me.

Your skeleton is made up of over 200 bones. They are locked together, but can still move. Your bones are made of cells. They are alive and growing bigger every day.

1. How many bones do you have?

2. Why do you have a skeleton?

3. Why can your skeleton get bigger?

4. What would you be like without a skeleton?

5. Name some bones in your body?
