

Letter to parents for students to create a project for an animal and habitat report and project.

# Animal and Habitat Investigation

We are learning about animals and their habitats. Each student will get to choose a habitat and an animal in class. Students will create a project at home to show the following and complete a report.

1. The animal
2. The habitat of the animal
3. What the animal eats
4. Other interesting facts about the animal

Your child may select a project to show their learning from the list of ideas below. Students will be presenting these projects in class.

1. Poster
2. Diorama
3. Mobile
4. Photo Book

Students may use information learned in class or collect information from resources (library books, internet). This project is designed for students to complete but please assist your child as they will need help. Have fun! We are excited to learn about the different types of habitats.
