

Learning the Parts of an Insect

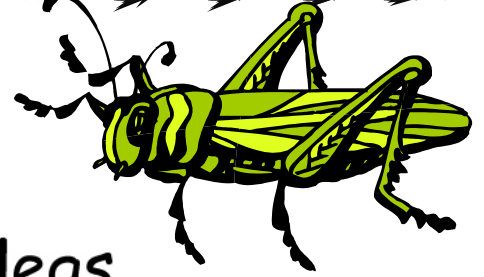

Name: _____

What is an Insect?

Facts

Insects are small animals with six legs.

Insects wear their skeletons on the outside of their bodies. This is called an exoskeleton. This protects an insect's body.

Insects are cold-blooded.

Insects have a heart, brain, tummy and nerves.

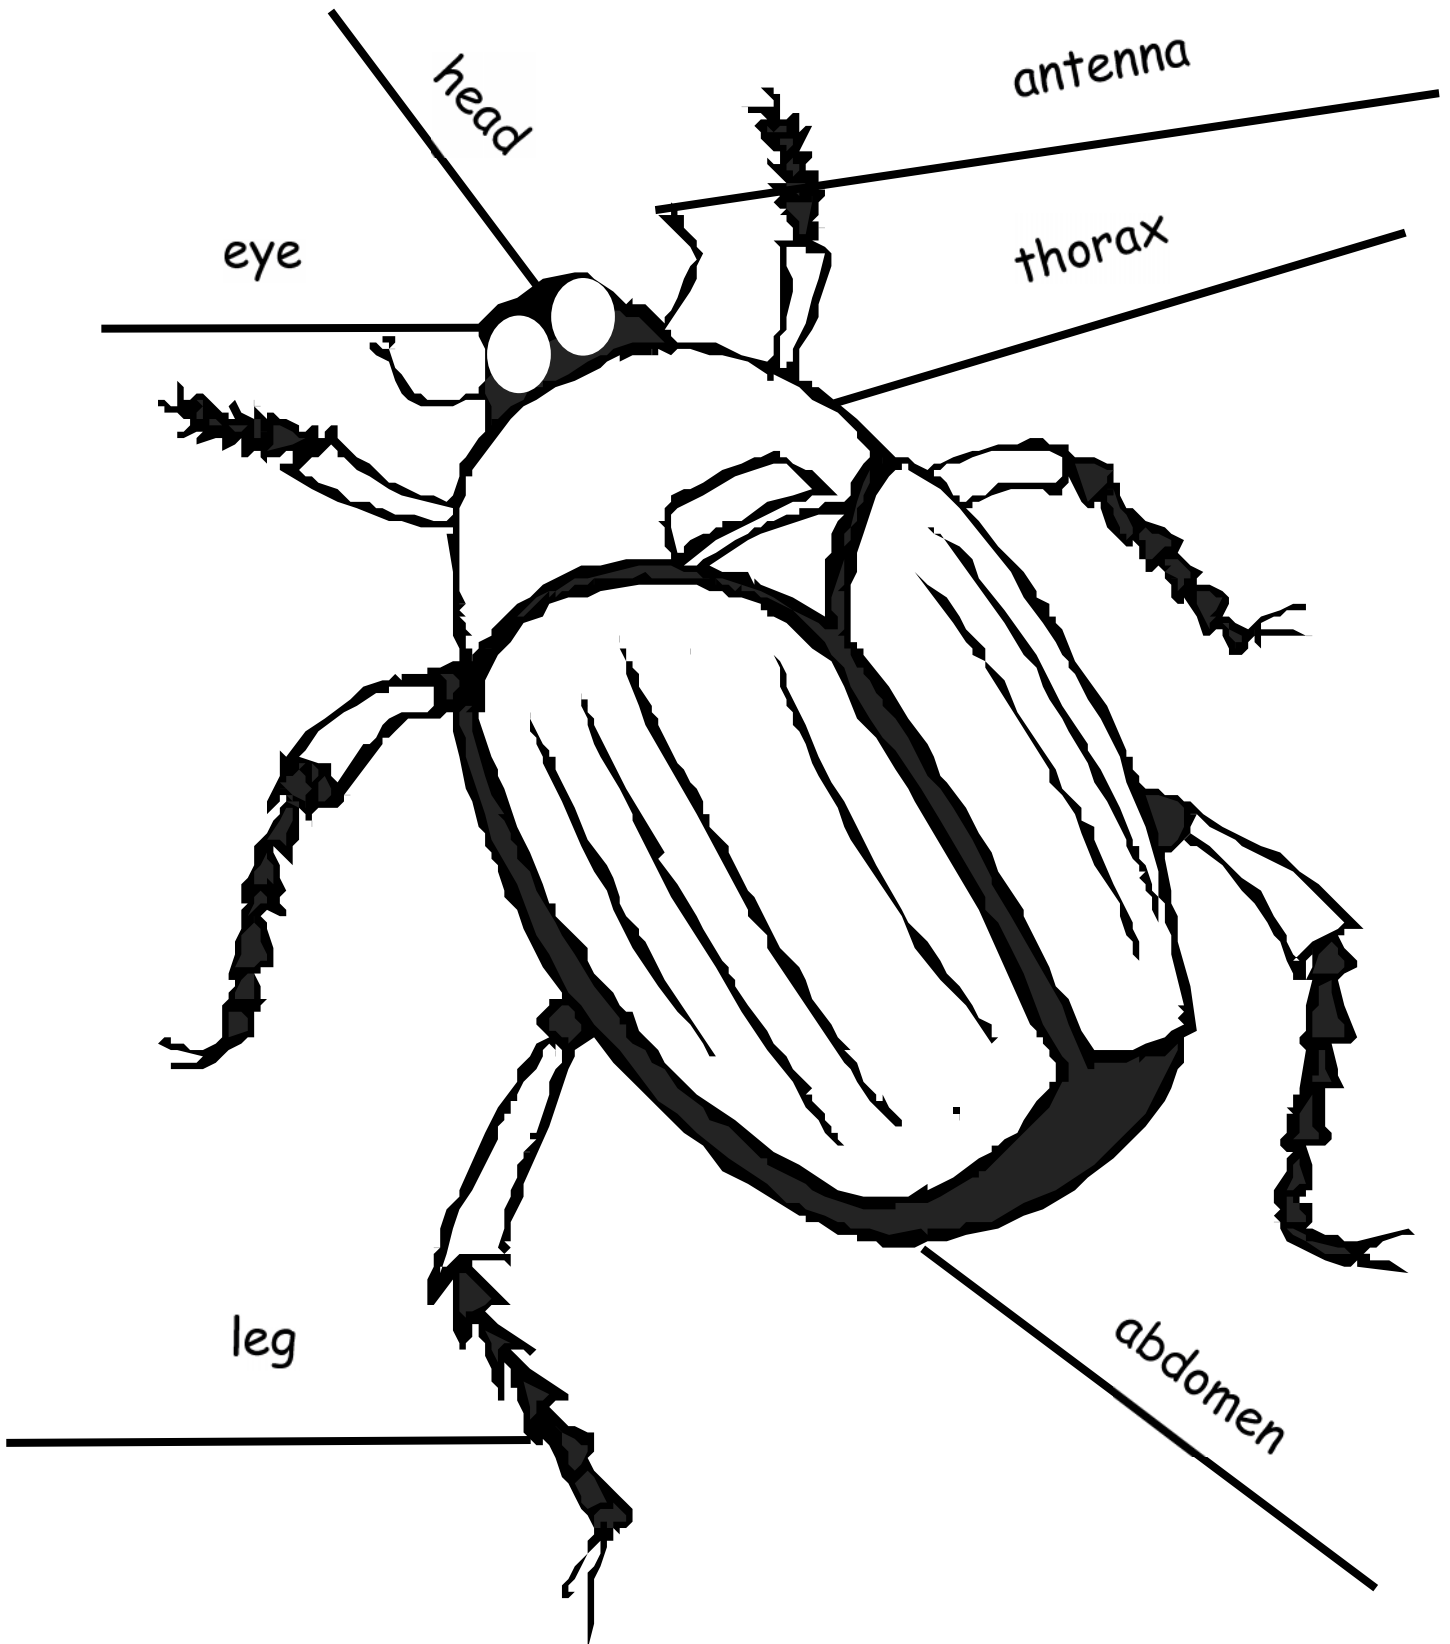

Most insects live short lives. Some only live a few hours.

Insects do not have noses; they smell with their feelers or antennae.

Insects can see, smell and hear things that humans cannot.

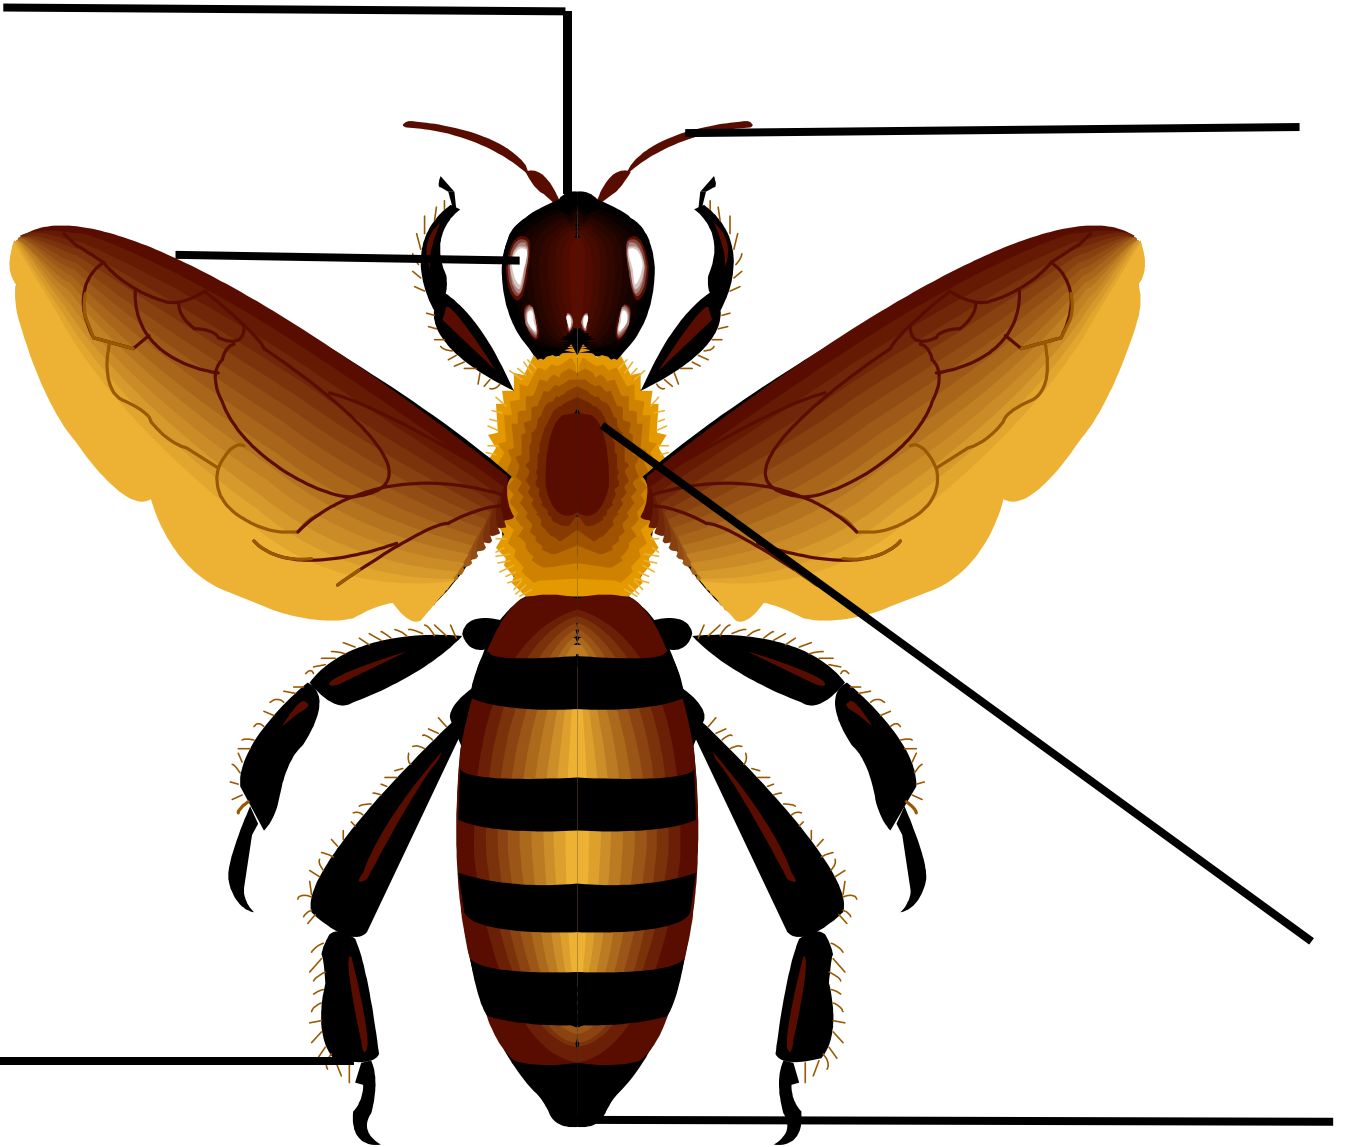

Insects communicate with each other in several ways. Some sing, dance or flash lights to signal each other.
